WISE WOMEN USE AI · YOUR WORKSHOP KIT

Content System Kit

one idea, many ways in

From the free workshop Build Your Content System
Wednesday 14 October 2026 · Kelly Hartley

START HERE

How to use this *kit*

1 Read pages 3 to 5 for the whole picture.

2 Work through the four steps. Each one has a prompt in a box: copy it, fill in the [brackets] and paste it into Claude or ChatGPT.

3 Use the worked example to see what good looks like, then plan your first batch on page 23.

Your ideas can do more work 03

The whole system and the waterfall 04

Step 1 · Show it how you sound 06

Step 2 · Show it what your content looks like 08

Step 3 · Choose something you've already made 10

Step 4 · Build your content waterfall 12

The worked example, piece by piece 14

Nothing written down yet? 19

One photo, three treatments 20

Plan your batch and keep it moving 23

Ask AI to review your last month 25

The request you can reuse 26

WHY THIS MATTERS

Your ideas can do more *work*

You know your subject. Finding another hour to turn it into content is the harder part. This kit helps you take something you've already made and give it more jobs, so you're not starting from a blank page every time.

Less from scratch

Reuse the thinking you've already done.

More ways in

People find you in the format they like: a video, a carousel, an email.

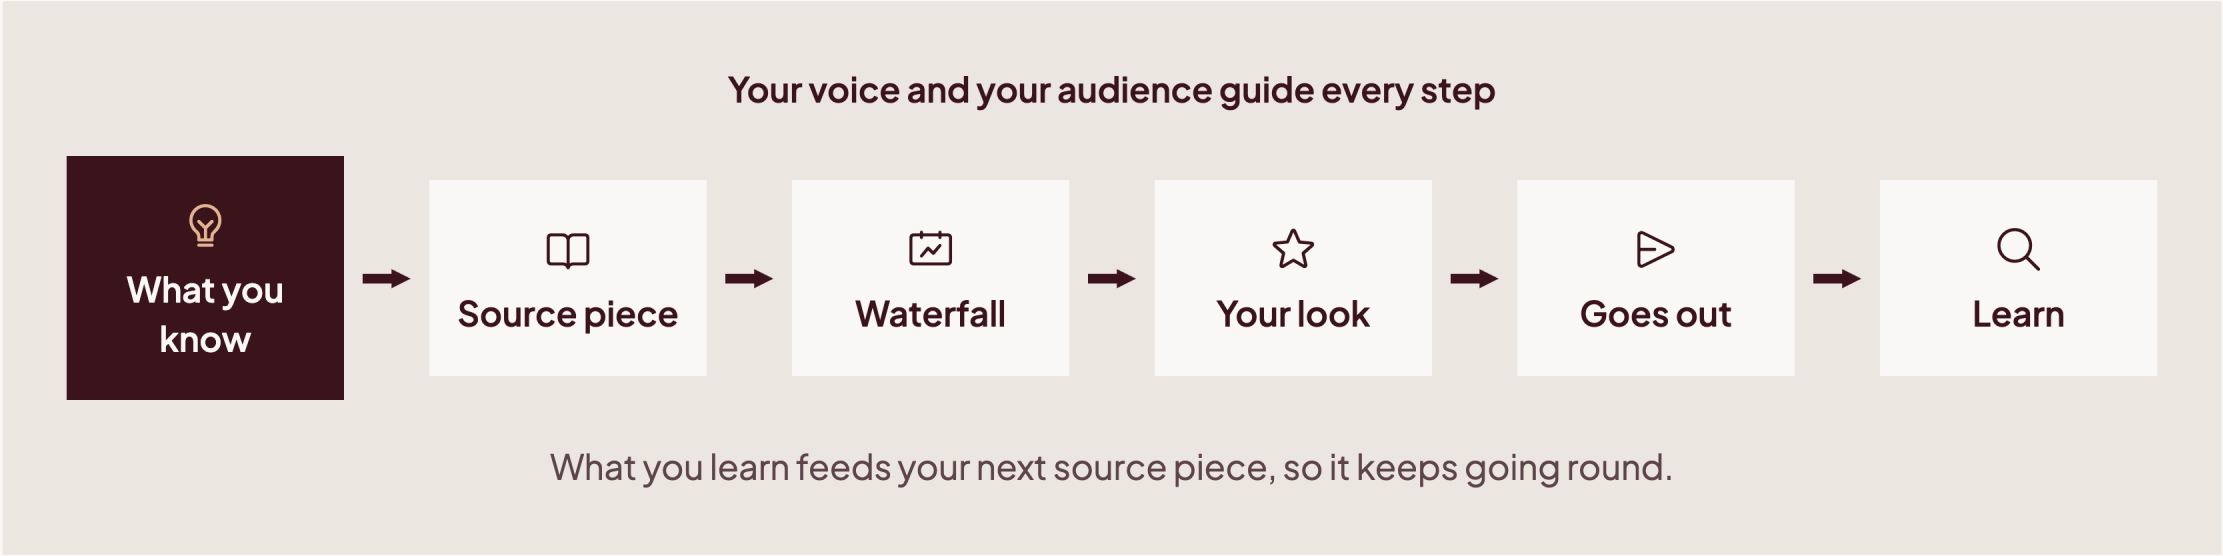

Ready for busy weeks

When you have a busy week, there's already something made and ready to go.

You still decide what to say, and you still check everything before it goes out.

THE BIG PICTURE

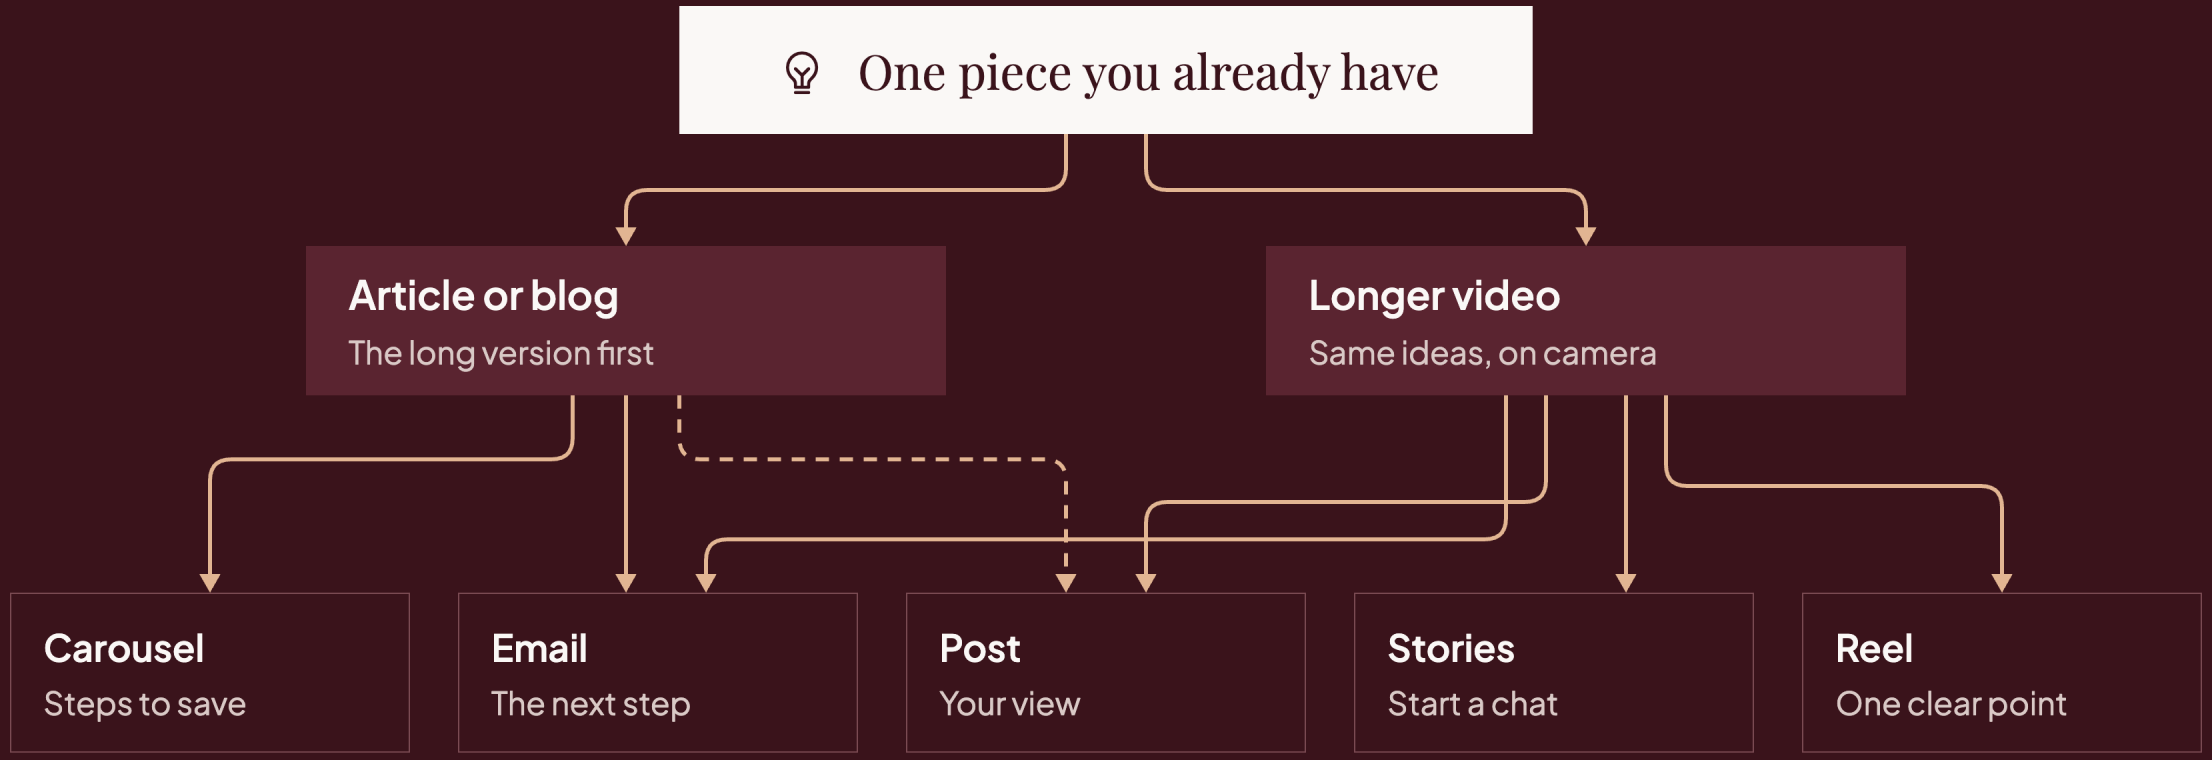

The whole content *system*

A prompt on its own, or a photo edit on its own, is just one part. It's how the parts connect that makes it repeatable.

the heart of it

The content waterfall

Long first, short after. Pick the branches that help your audience, not every one, every time.

STEP 1 · YOUR VOICE

Show it how you *sound*

"Make it sound like me" leaves a lot to guess. Two or three pieces of your own writing give AI far more to work with. A transcript of you talking works brilliantly too.

Ask it to describe how you write: the words you use, how you explain things and what you'd never say. Read the description and fix anything it's got wrong. That's your voice reference, a short note you can use again and again.

The prompt is on the next page.

KEEP TWO EXAMPLES IN YOUR NOTE

A sentence that sounds like you

"Pop the kettle on. This will take ten minutes, and you'll use it every week."

A sentence you'd never say

~~"Unlock your potential with this game-changing hack."~~

Those two lines often do more than "warm and authentic" ever will.

PROMPT 1 · STEP 1

Build your voice *reference*

Copy everything in the box. Replace the [brackets] with your own details.

COPY THIS PROMPT

Read these examples of my own writing or transcribed speech: [paste two or three examples].

Describe the voice you can actually observe: sentence length, everyday words, how I explain things, how direct I am, humour, and phrases I would avoid. Show evidence from the examples. Do not invent personality traits.

Create a one-page voice reference with five practical writing rules. Separate established habits from suggestions, and ask me to correct the reference.

For every future draft, preserve my meaning and uncertainty. Do not invent my experiences, customer stories, results, credentials or quotations.

Then: save the note it gives you. You'll attach it, or keep it in a Claude Project, every time you write.

STEP 2 · YOUR LOOK

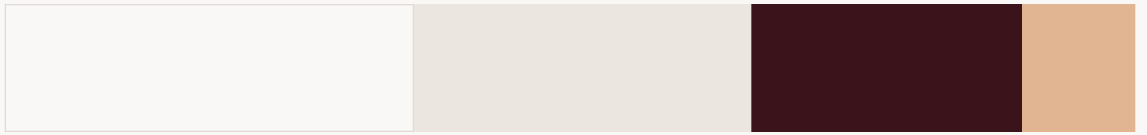

Show it what your content *looks* like

Your colours, fonts and photo style make everything feel like it comes from the same place. Keep them together with your writing examples in one document: your Content Style file.

You don't need a full rebrand first. Start with the choices you're already making. In Claude, save it in a Project so it's there every time.

The prompt is on the next page.

HERE'S MINE

Pearl · Greige · Bordeaux · Blush

Playfair Display · headlines

Big, quiet, *certain.*

Allison · notes and quotes

The older I get, the less I explain myself.

Plus Jakarta Sans · everything else

Body copy, captions and the small call to action.

PROMPT 2 · STEP 2

Make your Content Style *file*

Copy everything in the box. Attach any brand files you already have.

COPY THIS PROMPT

Help me make a reusable Content Style file. Ask about one area at a time: my existing fonts and colours; examples I like and what I like about them; how I want photos to feel; caption readability; video pace and framing; covers; graphics; music; and things I dislike.

Use the brand files I provide. If I have no settled fonts or colours, offer a simple provisional option and label it as a suggestion.

Return a plain document containing: audience and purpose; voice rules and approved examples; font names, files and fallbacks; exact colour values from my brand source; photo treatment and identity rules; video framing, cuts, captions, text placement and sound rules; cover and carousel rules; what to avoid; and an approval checklist, version and date.

Keep it portable, and show me how to paste or attach it to my next brief.

Then: test it on one piece and correct it before you make a batch.

STEP 3 · YOUR SOURCE PIECE

Choose something you've already *made*

- Old newsletters
- Emails answering a client
- Posts that did well
- Talks, Zooms and recordings
- Blog posts and articles
- Questions you answer all the time
- Workshop or course material
- **Your website pages**

A good source has:

- ✓ A clear point
- ✓ A real example
- ✓ Enough detail to teach

PROMPT 3 · STEP 3 · OPTIONAL

Shape your source *piece*

Only if your source needs tidying first. If it's already good, skip to Step 4.

COPY THIS PROMPT

Use only the attached source piece and my voice reference. Create one [newsletter / article / long-form video script] for [reader]. Its job is to help them understand [one point] and take [one useful action].

Use a specific opening grounded in my source. Develop the idea with the example I actually gave. Include relevant limits. End with one appropriate next step: [resource or offer]. Draft for [length]. Do not stretch thin source material.

After the draft, map each factual claim or personal example to its source passage, and mark missing facts [CHECK]. Do not put invented experience into the first person. Return the draft for review. Do not publish it.

Then: read it aloud. Change anything that doesn't sound like you, and save the approved version before making smaller pieces.

STEP 4 · YOUR WATERFALL

Give each format its own *job*

Newsletter
Develop the thought and invite a reply or next step.

Article
Explain the reasoning for readers who want more context.

Longer video
The same ideas, talked through on camera.

Reel
One point someone can use straight away, written to be said aloud.

Carousel
A short process or checklist people save.

Short post
One clear opinion and the reason behind it.

Stories or a thread
Start a conversation or show a real example.

Email
Invite the right people to the next step.

Same point, different presentation. Don't force every format from a thin source, and only use the channels you actually use.
The prompt is on the next page.

PROMPT 4 · STEP 4

Build your content *waterfall*

Attach your source piece and voice reference, or work inside your Claude Project.

COPY THIS PROMPT

Use my attached source piece and my voice reference. Plan a small content waterfall for [channels] over [period]. For each piece give: the audience moment, the format, its distinct job, the source section it uses, the useful takeaway, one next step and the production effort. Choose only formats the source supports. Leave out a story if I didn't supply one. Show me the map first. Don't write the pieces yet.

After I review the map, draft the branches I choose: an article or long-form video script that develops the reasoning; a short spoken Reel making one useful point, with a separate screen hook; a carousel explaining a practical sequence with useful detail; a short opinion post with its reason; a Story sequence or thread that starts a relevant conversation; and an email inviting people to an existing resource or offer.

Write fresh copy for each platform, with a different opening each time. List any repeated points I should cut and mark claims that need checking. Keep everything as a draft until I approve it.

Then: keep the pieces that earn their place, cut anything invented, and fix it while they're side by side.

Subject: Before you create another piece of content

Pages 15 to 18 show everything this one newsletter became.

You have written a useful newsletter. Then you open Instagram and try to think of something completely different to say.

Before you start again, look at what is already there: the point you made, the example you used and the steps someone could follow.

That newsletter can be the starting point for several useful pieces. A short video might explain one answer out loud. A carousel can show the steps. A short post can share your view and why you hold it. An article gives you room to develop the reasoning for someone who needs more context.

The content needs to work in the place you are using it. Someone watching a short video needs a clear spoken point. Someone saving a carousel needs a sequence they can come back to. Repeating the same paragraph everywhere misses that opportunity.

AI can help with these adaptations when you give it your original piece, examples of how you write and a clear job. Keep the details that make the advice useful. Read the drafts together and change anything you would not say.

Your visual choices matter too. Save your fonts, colours, photo treatment and editing preferences so the pieces belong to the same business.

Once the pieces are checked, prepare them for the days you want to use them. That gives you content ready for a busy week, rather than another decision waiting for you each morning.

Useful content gives people a chance to understand your thinking. Where there is a relevant next step, make it clear. For your next batch, choose one piece you have already made, and find its useful parts before asking AI for more.

Kelly

WORKED EXAMPLE · BRANCHES 1 AND 2

The long version and the *short* one

ARTICLE · ROOM TO EXPLAIN

How to turn one newsletter into useful social content

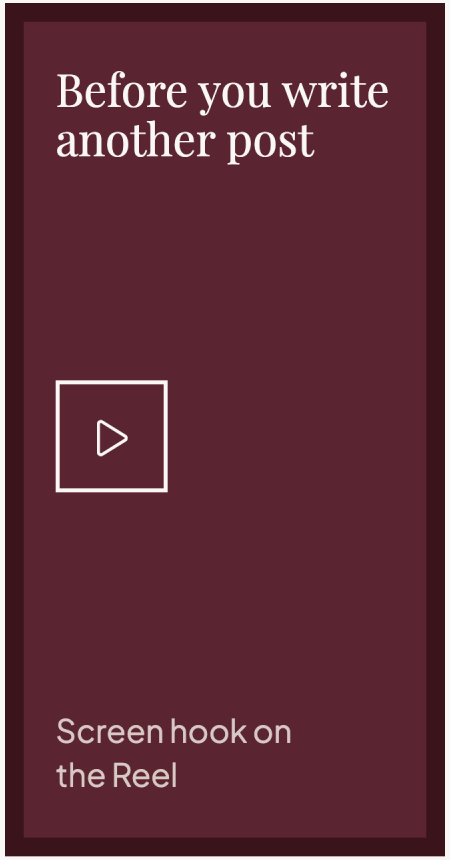

Choose a source with something to say. A point and enough detail to explain it.

Give each format a job. A video explains one answer. A carousel shows a process.

Give AI your reference. The source, your writing examples, your audience and the purpose.

Make the pieces recognisable. Your fonts, colours, photos and captions.

Prepare and learn. Review the batch, schedule it, then read the replies.

REEL · ONE CLEAR POINT

"Before you write another post, open your last newsletter. Find one question you answered. Explain that answer in a short video. You already have the subject. Now make it easy to follow out loud."

Caption: Your last newsletter may contain your next useful video. One clear point is enough.

WORKED EXAMPLE · BRANCH 3 · CAROUSEL

Steps people *save* for later

Your next post may already be in your *newsletter*

Swipe for the steps

2

Find one useful point

What question did you answer? Keep the advice and example that helped.

3

Choose the best format

A sequence becomes a carousel. One clear answer, a short video.

4

Keep it yours

Give AI your source and writing examples. Use your fonts and colours.

5

Check it and prepare it

Read the pieces together. Cut repeats and anything you wouldn't say.

Name the step, then *teach* it.

The headings are signposts. Under each one, give enough explanation that someone can save it and actually do it later, without you there.

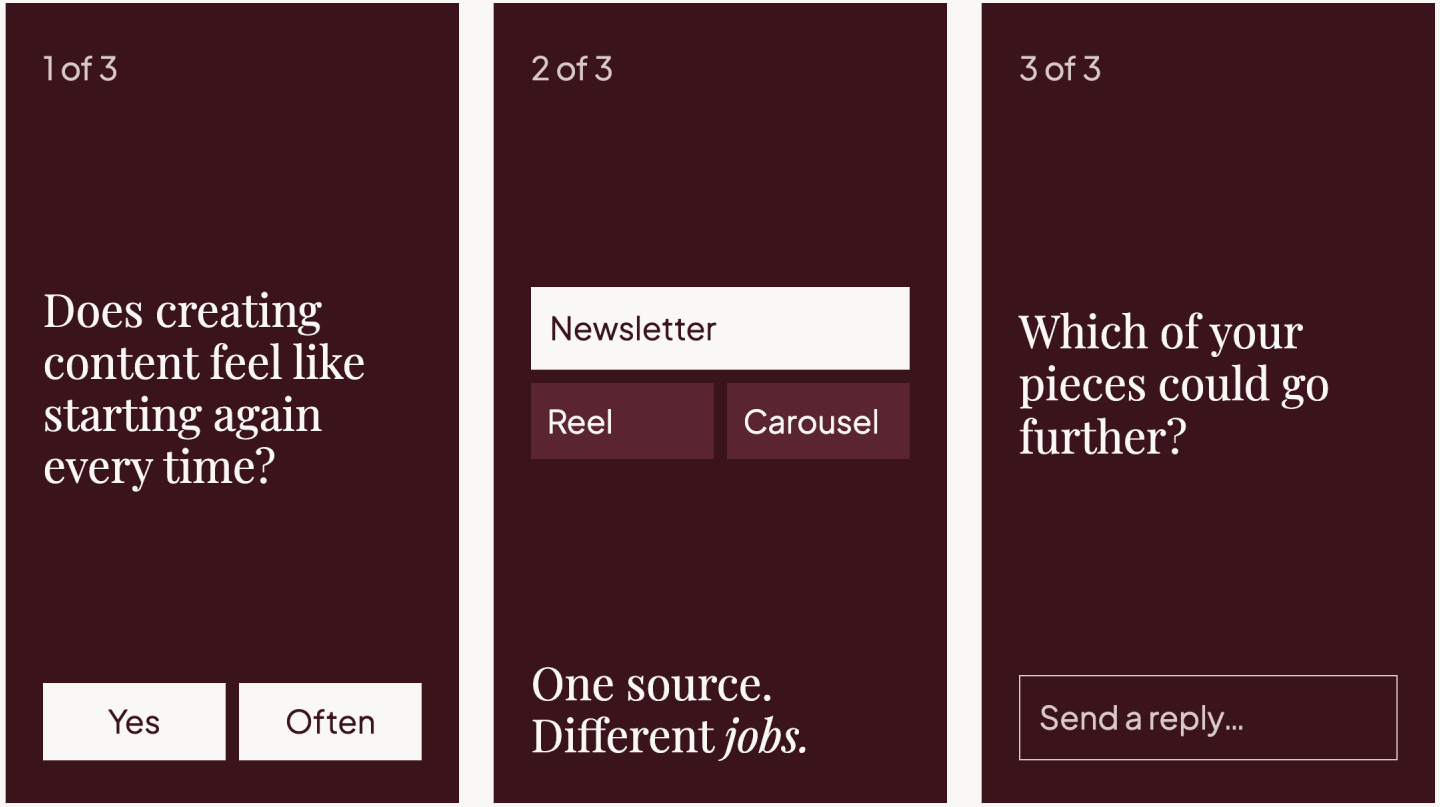

WORKED EXAMPLE · BRANCHES 4 AND 5

A view worth sharing, and room for a *reply*

You don't need a brand-new idea for every *post.*

Someone who missed your newsletter may get the point from a video. Keep the useful idea. Change how you present it.

Short post · one opinion and its reason

Stories · start a conversation. On Threads? The same idea works as three short posts.

WORKED EXAMPLE · BRANCH 6 · EMAIL

A clear *next* step

From: Kelly at Wise Women Use AI
Subject: Make your content go further

If you have useful knowledge but keep starting from scratch when it's time to post, join me for Build Your Content System.

I'll show how one piece becomes a content waterfall: articles, short videos, carousels, posts and a relevant invitation, all still sounding and looking like you.

There's nothing to prepare. Everyone registered gets the kit and the replay.

Save your free place

Kelly

GIVE YOUR CONTENT SOMEWHERE TO LEAD

- Helpful content introduces an idea
- A resource helps someone use it
- Email lets you stay in touch
- **An offer is there when they're ready**

Not every post needs to sell. The next step just needs to fit what came before it.

PROMPT 5 · NOTHING WRITTEN DOWN YET?

Let AI *interview* you

Answer by speaking or typing. A voice memo on a walk works too.

COPY THIS PROMPT

Act as my content interviewer. Do not write content yet. My audience is [who]. I help them with [work]. Today's idea is [idea].

Ask one question at a time and wait for my answer. Start with a real question my customer might ask about this idea. Follow my answer rather than a fixed questionnaire, and ask for a particular example when I speak generally. Find out what I think, why, what I have actually tried, what changed, and where my advice has limits. Aim for six to eight questions, but stop when we have enough for one useful piece. Do not suggest my opinions or write a story for me.

Before drafting, ask whether I want to add or correct anything. Then return: my central point, in my words; useful phrases quoted exactly from my answers; examples and facts, with the answer each came from; things that need checking or permission; and gaps you cannot fill without asking me.

Then: tidy the transcript lightly, add an opening and a closing line, and that's your source piece. It's all your words.

YOUR PHOTOS

One photo, three *treatments*

Same photo, same background. Only the light, colour and tone change.

The original

Soft editorial

Bright and crisp

Quiet and moody

Pick one and use it every time. That's what makes your content look consistent. Results vary each time, so always compare with your original.

PROMPTS 6 TO 8 · YOUR PHOTOS

Copy a *treatment*

Attach your original photo. If your face or the room changes, start again from the original.

START EVERY PROMPT WITH THIS

Edit this original photo. Keep the same background, room and everything in it: change only the light, colour and tone. Keep my face, age, expression, hair, clothes and pose exactly as they are. No retouching, reshaping, added text or new objects.

Soft editorial

Then add: Make this look like an 85mm editorial portrait: pulled-in framing, a softly blurred background that still shows the room, sharp detail on my face, broad soft window light, gentle contrast and warm neutral colour. Keep real skin texture and a fine natural grain. Keep it photorealistic.

Bright and crisp

Then add: Make this look like a bright daylight portrait on a 50mm lens: clean, even light, clear whites, true-to-life colour and crisp detail from front to back, with the same background sharpened and cleaned up. Keep real skin texture, with no shine. Keep it photorealistic.

Quiet and moody

Then add: Make this look like a still from a quiet film shot on 35mm: low light from one side so half my face is gently brighter, deep shadows that still hold detail, muted warm colour and fine film grain. Keep the real room and my expression. Keep it photorealistic.

If you came to the workshop live, your Visual Style Pack has all fifteen treatments.

PROMPT 9 · YOUR VIDEO

Give one Reel a consistent *finish*

You'll need a tool that actually edits video. A chat that describes an edit is just a plan.

COPY THIS PROMPT

Use my original talking-head clip and my approved Content Style file. First confirm whether you can inspect the actual video and produce an edited file. If you cannot, give me a clear editor handoff without claiming to have edited it.

For one short Reel, keep the order and meaning of my words. Remove a false start or long empty pause only where the cut stays natural, and never make me say a sentence I did not record. Use readable captions in my brand font, no more than two lines at once, kept away from my face and the platform buttons. Use simple cuts, consistent framing and one opening screen hook. Music is optional and must be licensed for my use.

Return a short edit plan with source timecodes, the proposed cuts, caption corrections and a cover suggestion. Render only after I approve the plan. Keep the original file and do not publish.

Then: watch it back on your phone. Check the words, the spelling and the sound.

YOUR TURN

Plan your first small *batch*

Print this page, or copy the headings into your own document.

My reader and their question	**My central point**
My source piece, and where it lives	**Three formats, and the job of each**
A phrase of mine to keep	**A visual rule to keep**
One invitation, and where it leads	**What I still need to check**
Review date	**Days each piece goes out**

MAKING IT REPEATABLE

One piece, used all *month*

WEEK 1

Pick a piece you already have and map out its waterfall.

WEEK 2

It becomes carousels and posts.

WEEK 3

Video and Reels, with no new prep. The thinking's done.

WEEK 4

Look back at what landed, and pick next month's piece.

Give every piece a status

Draft → Needs correction → Approved → Scheduled → Published → **Checked**

Afterwards, note the replies, saves, sign-ups and enquiries, not just the reach, and how long it took you. A great question from a reader can be your next newsletter.

PROMPT 10 · CHECK WHAT'S WORKING

Ask AI to review your last *month*

On a paid Claude plan, use the Claude in Chrome extension. On the free plan, paste in screenshots of your grid instead.

COPY THIS PROMPT

Open my Instagram profile at instagram.com/[your handle] and look at my posts from the last 30 days. My business: [what you do and who you help]. My goal for content right now: [for example, more enquiries or more email sign-ups].

For each post, note the format (Reel, carousel or single image), the topic, the first line, and the likes and comments you can see. Then tell me: 1. What I mostly post about, and whether it's clear who it's for. 2. Which posts got the most response, and what they have in common. 3. Whether my posts lead anywhere: my email list, a free resource or an offer. 4. What's missing, given my goal. 5. Three specific changes for next month.

Only use what you can see. Don't guess numbers, and tell me if anything wasn't visible.

Then: pick one change for next month. Posting with a plan beats posting to be seen.

PROMPT 11 · USE IT EVERY WEEK

The request you can *reuse*

Once your voice reference and style file are ready, this is the one to keep.

COPY THIS PROMPT

Use my source material, voice reference and Content Style file attached here. Create [one talking-head script / one carousel / one B-roll post / a proposed batch for this month] about [subject] for [audience].

Use my thinking and examples. If an important point is missing, ask me one question rather than inventing it. Choose a hook the content can honestly deliver.

For a talking head, give me a natural script and a separate screen hook. For a carousel, give me the copy for each slide. For B-roll, give me the on-screen text, caption and a footage suggestion. For a batch, vary the subjects, jobs and formats, and leave out weak repeats.

Give me captions for [channels]. Show what needs recording, editing or checking. Return drafts for review; do not publish.

Your part: supply the thinking, record where needed, and check the finished content.

YOUR ONE THING THIS WEEK

Pick one good piece you've already written, and map out its *waterfall.*

You don't need to do it all at once. One piece, a few formats, checked and ready for a busy week.

Kelly

TWO WAYS FORWARD

Do it yourself

Everything you need is in this kit and the replay.

The Architect Advantage

Help setting it up around your own business. Two live sessions a month: Build, where we set something up together, and Fix, where we sort out whatever got stuck. US$69 a month, cancel any time.
